# The PACalendar

## Penn State Faculty, Staff, and Students:

On behalf of the Performing Arts Council, we are excited to share our newest project with you, The PACalendar mobile app! By combining various arts calendars from across the university, we believe this project will help to unite and promote the vibrant arts community at Penn State.
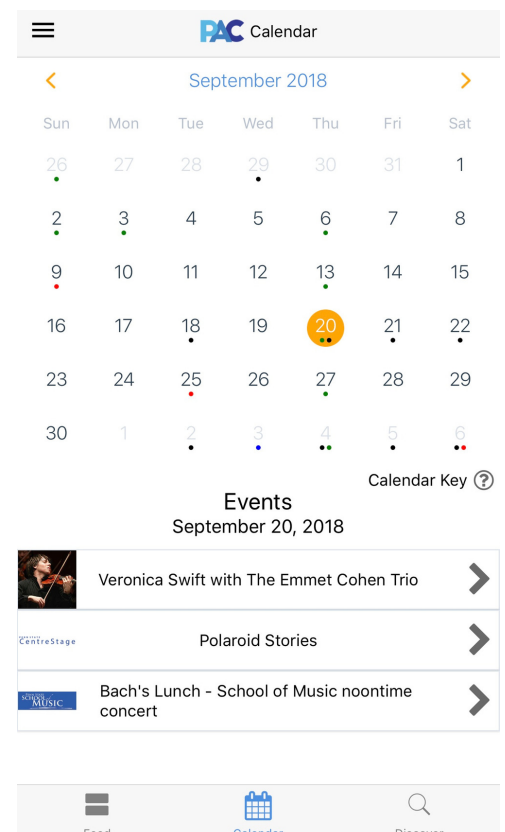

**All of your favorite arts events on campus.**

**All in one place.**

### What is The PACalendar?

The PACalendar is a mobile app that serves as a single platform for accessing information on performing arts events across campus. The goal of the app is to connect three prominent University entities: Center for the Performing Arts at Penn State, the College of Arts and Architecture, and student-led performing arts groups. For the first time ever, The PACalendar will allow potential attendees to view the robust calendars of these three separate entities in a central place. By doing so, we hope to increase and diversify audiences by making event information accessible, convenient, and customizable.

### A Brief "How-To" Use:

The PACalendar is modeled after the user-friendly Google Calendar. Users log into the app via Facebook or Gmail. Events on the calendar are sorted by genre, organization, and date. Users may select particular events to export to their personal calendar and/or share to Facebook.
